PROFESSIONAL PROFILE

Fourth-year Systems Engineering student at the National University of Costa Rica, with a strong self-taught approach to learning. I have developed skills in information systems development, covering areas such as databases, operating systems, networks, web development, and data structures. I am currently seeking opportunities to apply and expand my experience in professional environments, contributing with effective and efficient solutions.

EXPERIENCE

P2P (Peer-to-Peer) Sistema:

February 2024

National University of Costa Rica - Course: Operating Systems

Description: Development of a P2P (Peer-to-Peer) system in C language for Linux environments, using the Pthreads library for thread management. The project focuses on basic network handling, file systems, and concurrency, following POSIX standards.

BackEnd:

I implemented recursive file cataloging and hash generation, developed mechanisms for efficient searching in the P2P network, and worked on the implementation of functionality for distributed file transfer.

Technologies Used: C, Pthreads, Sockets, POSIX, Linux

Purchase order system – SINART (National Radio and Television System):

February 2024

Description: I contributed to the development and implementation of a purchase order management system, automating previously manual processes to enhance efficiency and accuracy in procurement administration. My key responsibilities included.

- Backend development with PHP and Laravel, ensuring robust business logic.
- Creating dynamic user interfaces with Vue.js to enhance user experience.
- Managing and optimizing the MySQL database using phpMyAdmin.
- Designing UI prototypes in Figma to improve usability.
- Implementing automated workflows, reducing response times and minimizing errors in purchase order management.

This project transformed the existing manual system into a comprehensive digital solution, streamlining data entry, document generation, and request approvals.

Technologies Used: PHP, Laravel, Vue.js, MySQL, phpMyAdmin y Figma

Technical Skills

- Programming languages: C++, Java, SQL, C, JavaScript, Python, PHP, HTML, CSS.
 - Frameworks: Spring Boot, Laravel, Vue.js.
 - Databases: MySQL, Oracle, PostgreSQL, Microsoft SQL Server.
 - Version control: Git, GitHub.
 - Software and tools: Azure, Visual Studio Code, IntelliJ IDEA, NetBeans, Microsoft Office Suite.
 - Operating Systems: Windows, Linux.
 - Spanish (Native)
 - English (B1/B2)
-

EDUCATION

NATIONAL UNIVERSITY OF COSTA RICA
- Fourth-year Systems Engineering student.

**CLOUD AND VIRTUALIZATION
CONCEPTS** - VMware Academy

**DIPLOMA IN COMPUTER APPLICATIONS
PROGRAMMING** – UNA

**TECHNICAL ASSOCIATE DATA CENTER
VIRTUALIZATION** – VMware Academy

PYTHON ESSENTIALS 2 – Cisco

INTRODUCTION TO DATA SCIENCE –
Cisco

PYTHON ESSENTIALS 1 – Cisco

INTRODUCTION TO CYBERSECURITY –
Cisco

ENGLISH FOR IT 2 – Cisco

BACHELOR'S DEGREE – Liceo Rural de Jaris

ENGLISH FOR IT 1 – Cisco

PRIMARY SCHOOL – Santiago Alpizar
Jimenez

FULL-STACK DEVELOPMENT – Mimo
